Subject Index

Air Pollution
Treatment of Acetone Waste Gases Using Slurry-Phase Airlift Embedded with Polyacrylamide-Entrapped Cell Beads, 1230

Acetone
Treatment of Acetone Waste Gases Using Slurry-Phase Airlift Embedded with Polyacrylamide-Entrapped Cell Beads, 1230

Activated Carbon
Adsorption and Regeneration on Activated Carbon Fiber Cloth for Volatile Organic Compounds at Indoor Concentration Levels, 31
Investigation of the Treatability of the Primary Indoor Volatile Organic Compounds on Activated Carbon Fiber Cloths at Typical Indoor Concentrations, 882
Replacement of Hazardous Chromium Impregnating Agent from Silver/Copper/Chromium-Impregnated Active Carbon Using Triethylenediamine to Remove Hydrogen Sulfide, Trichloromethane, Ammonia, and Sulfur Dioxide, 258
Steady-State Performance of an Activated Carbon Biofilter Degrading Styrene: Effects of Residence Time and Inlet Concentration, 45

Adsorption
Adsorption and Regeneration on Activated Carbon Fiber Cloth for Volatile Organic Compounds at Indoor Concentration Levels, 31
Adsorption Kinetic, Thermodynamic, and Desorption Studies of Isopropyl Alcohol Vapor by Oxidized Single-Walled Carbon Nanotubes, 990
Impact of Fly Ash Composition on Mercury Speciation in Simulated Flue Gas, 1331
Investigation of the Treatability of the Primary Indoor Volatile Organic Compounds on Activated Carbon Fiber Cloths at Typical Indoor Concentrations, 882

Adsorption of Mercury Chloride
Kinetic Modeling on the Adsorption of Vapor-Phase Mercury Chloride on Activated Carbon by Thermogravimetric Analysis, 227

Advanced Collaborative Emissions Study (ACES)
Testing of a Heavy Heavy-Duty Diesel Engine Schedule for Representative Measurement of Emissions, 960

Aerosol Optical Depth (AOD)
Comparison of GOES and MODIS Aerosol Optical Depth (AOD) to Aerosol Robotic Network (AERONET) AOD and IMPROVE $PM_{2.5}$ Mass at Bondville, Illinois, 1082
2009 Critical Review Discussion: Remote Sensing of Particulate Pollution from Space: Have We Reached the Promised Land?, 1130
The Relation between Moderate Resolution Imaging Spectroradiometer (MODIS) Aerosol Optical Depth and $PM_{2.5}$ over the United States: A Geographical Comparison by U.S. Environmental Protection Agency Regions, 1358

Aerosol Research
Analytical Determination of the Aerosol Organic Mass- to-Organic Carbon Ratio, 58

Aerosol Spectrometer
Aerosol Measurement: The Use of Optical Light Scattering for the Determination of Particulate Size Distribution, and Particulate Mass, Including the Semi-Volatile Fraction, 101

Aerosols
Analytical Determination of the Aerosol Organic Mass-to-Organic Carbon Ratio, 58
Applications of the Three-Dimensional Air Quality System to Western U.S. Air Quality: IDEA, Smog Blog, Smog Stories, AirQuest, and the Remote Sensing Information Gateway, 980
Characterization of the Sunset Semi-Continuous Carbon Aerosol Analyzer, 826
Could Ozonation Technology Really Work for Mitigating Air Emissions from Animal Feeding Operations?, 1239
2009 Critical Review: Remote Sensing of Particulate Pollution from Space: Have We Reached the Promised Land?, 645
Current Understanding of Ultrafine Particulate Matter Emitted from Mobile Sources, 3
Energy Recycling by Co-Combustion of Coal and Recovered Paint Solids from Automobile Paint Operations, 560
Introduction to a Special Issue of *JA&WMA* on Aerosol and Atmospheric Optics: Visual Air Quality and Radiation, 1025
The In-Plume Emission Test Stand: An Instrument Platform for the Real-Time Characterization of Fuel-Based Combustion Emissions, 1437
Measurements of OC and EC in Coarse Particulate Matter in the Southeastern United States, 78
Particle Optics in the Rayleigh Regime, 1028
Particulate Matter Sample Deposit Geometry and Effective Filter Face Velocities, 1045
The Relation between Moderate Resolution Imaging Spectroradiometer (MODIS) Aerosol Optical Depth and $PM_{2.5}$ over the United States: A Geographical Comparison by U.S. Environmental Protection Agency Regions, 1358
Toward Establishing the Stability of Multi-Year Monitoring of Elements in Airborne Particles, 1040

Aftertreatment Device
Effect of Open Channel Filter on Particle Emissions of Modern Diesel Engine, 1148

Aggregate-Producing Facilities
PM_4 Crystalline Silica Emission Factors and Ambient Concentrations at Aggregate-Producing Sources in California, 1287

Agriculture
Could Ozonation Technology Really Work for Mitigating Air Emissions from Animal Feeding Operations?, 1239
Evaluation of Wood Chip-Based Biofilters to Reduce Odor, Hydrogen Sulfide, and Ammonia from Swine Barn Ventilation Air, 520
Seasonal Ammonia Emissions from a Free-Stall Dairy in Central Texas, 613

Air Pollution
Atmospheric Emissions from a Passenger Ferry with Selective Catalytic Reduction, 18
Coarse Particulate Matter Apportionment around a Steel Smelter Plant, 514
A Comparative Analysis of Modeled and Monitored Ambient Hazardous Air Pollutants in Texas: A Novel Approach Using Concordance Correlation, 1278
Development of Welding Emission Factors for Cr and Cr(VI) with a Confidence Level, 619
Effect of Air Pollution Controls on Black Smoke and Sulfur Dioxide Concentrations across Ireland, 207
Effect of E85 on Tailpipe Emissions from Light-Duty Vehicles, 172

Estimating Mortality Effects of Fine Particulate Matter in Japan: A Comparison of Time-Series and Case-Crossover Analyses, 1212
Estimating Precision Using Duplicate Measurements, 1032
Greenhouse Gas and Air Pollutant Emission Reduction Potentials of Renewable Energy—Case Studies on Photovoltaic and Wind Power Introduction Considering Interactions among Technologies in Taiwan, 360
The Impact of Background Ozone on Compliance with Revised National Ambient Air Quality Standards, 52
Impact of Mine Waste on Airborne Respirable Particulates in Northeastern Oklahoma, United States, 1347
The In-Plume Emission Test Stand: An Instrument Platform for the Real-Time Characterization of Fuel-Based Combustion Emissions, 1437
Particle Emissions from Ships: Dependence on Fuel Type, 1391
Particulate Air Pollution and Health Effects for Cardiovascular and Respiratory Causes in Temuco, Chile: A Wood-Smoke-Polluted Urban Area, 1481
Portable Emission Measurements of Yellowstone Park Snowcoaches and Snowmobiles, 936
Titanium Dioxide/Zeolite Catalytic Adsorbent for the Removal of NO and Acetone Vapors, 1186

Air Quality
Applications of the Three-Dimensional Air Quality System to Western U.S. Air Quality: IDEA, Smog Blog, Smog Stories, AirQuest, and the Remote Sensing Information Gateway, 980
Combining Regional- and Local-Scale Air Quality Models with Exposure Models for Use in Environmental Health Studies, 461
2009 Critical Review: Remote Sensing of Particulate Pollution from Space: Have We Reached the Promised Land?, 645
Evaluation of Wood Chip-Based Biofilters to Reduce Odor, Hydrogen Sulfide, and Ammonia from Swine Barn Ventilation Air, 520
Introduction to the 2009 Critical Review: Remote Sensing of Particulate Pollution from Space: Have We Reached the Promised Land?, 642
Investigation of the Treatability of the Primary Indoor Volatile Organic Compounds on Activated Carbon Fiber Cloths at Typical Indoor Concentrations, 882
The National Ambient Air Monitoring Strategy: Rethinking the Role of National Networks, 579
Ozone, Trace Gas, and Particulate Matter Measurements at a Rural Site in Southwestern New York State: 1995–2005, 293
The Relation between Moderate Resolution Imaging Spectroradiometer (MODIS) Aerosol Optical Depth and $PM_{2.5}$ over the United States: A Geographical Comparison by U.S. Environmental Protection Agency Regions, 1358
The Social Distribution of Neighborhood-Scale Air Pollution and Monitoring Protection, 591

Air Quality Management
Assessment of the Ozone-Nitrogen Oxide-Volatile Organic Compound Sensitivity of Mexico City through an Indicator-Based Approach: Measurements and Numerical Simulations Comparison, 1155
A Compilation and Development of Spatial and Temporal Profiles of High-Resolution Emissions Inventory over Thailand, 845

Air Quality Model
Regional Impacts of Oil and Gas Development on Ozone Formation in the Western United States, 1111

Air Quality Network
Methods to Assess Carbonaceous Aerosol Sampling Artifacts for IMPROVE and Other Long-Term Networks, 898

Air Quality Planning
Source Contributions to Visibility Impairment in the Southeastern and Western United States, 1070

Air Quality Standards
Measurements of OC and EC in Coarse Particulate Matter in the Southeastern United States, 78

Air Quality Studies
Deciphering the Role of Radical Precursors during the Second Texas Air Quality Study, 1258
Modeling Regional/Urban Ozone and Particulate Matter in Beijing, China, 37
Seasonal Ammonia Emissions from a Free-Stall Dairy in Central Texas, 613
Titanium Dioxide/Zeolite Catalytic Adsorbent for the Removal of NO and Acetone Vapors, 1186

Air Toxics
Cluster Analysis for Polychlorinated Dibenzo-*p*-Dioxins and Dibenzofurans Concentrations in Southern Taiwan, 1474
Extractive Sampling and Optical Remote Sensing of F100 Aircraft Engine Emissions, 531
Modeling of Personal Exposures to Ambient Air Toxics in Camden, New Jersey: An Evaluation Study, 733
Multipathway Screening Factors for Assessing Risks from Ingestion Exposures to Air Pollutants, 419

Air Treatment
Biofiltration of Air Contaminated by Styrene Vapors on Inorganic Filtering Media: An Experimental Study, 568

Airborne Elements
Trace-Element Enrichment in Epiphytic Lichens and Tree Bark at Pico Island, Azores, Portugal, 411

Aircraft
Extractive Sampling and Optical Remote Sensing of F100 Aircraft Engine Emissions, 531
Methodology to Estimate Particulate Matter Emissions from Certified Commercial Aircraft Engines, 91

Airflow Rate
Real-Time Airflow Rate Measurements from Mechanically Ventilated Animal Buildings, 683

Airlift
Treatment of Acetone Waste Gases Using Slurry-Phase Airlift Embedded with Polyacrylamide-Entrapped Cell Beads, 1230

Airports
Methodology to Estimate Particulate Matter Emissions from Certified Commercial Aircraft Engines, 91

Almond Harvest
Particulate Matter Emission Factors for Almond Harvest as a Function of Harvester Speed, 943

Alternative
Comparison of Flexible Fuel Vehicle and Life-Cycle Fuel Consumption and Emissions of Selected Pollutants and Greenhouse Gases for Ethanol 85 Versus Gasoline, 912

Ambient Air
Intercomparison of Clean Air Status and Trends Network Nitrate and Nitric Acid Measurements with Data from Other Monitoring Programs, 214
An Optimal Spatial Configuration of Sample Sites for Air Pollution Monitoring, 1308

Source Apportionment of Airborne Particulate Matter for the Speciation Trends Network Site in Cleveland, OH, 321

Ambient Air Quality Standards
The Impact of Background Ozone on Compliance with Revised National Ambient Air Quality Standards, 52

Ambient Atmosphere
Cluster Analysis for Polychlorinated Dibenzo-*p*-Dioxins and Dibenzofurans Concentrations in Southern Taiwan, 1474

Ammonia (NH_3)
Characterization of the Winter Midwestern Particulate Nitrate Bulge, 1061
Could Ozonation Technology Really Work for Mitigating Air Emissions from Animal Feeding Operations?, 1239
Seasonal Ammonia Emissions from a Free-Stall Dairy in Central Texas, 613

Ammonium
Evaluating Environmental Parameters for Minimum Ammonium Losses during Composting of Trimming Residues, 790

Animal Buildings
Real-Time Airflow Rate Measurements from Mechanically Ventilated Animal Buildings, 683

Annapolis Valley
Quantifying the Spatial and Temporal Variation of Ground-Level Ozone in the Rural Annapolis Valley, Nova Scotia, Canada Using Nitrite-Impregnated Passive Samplers, 310

Apportionment
Coarse Particulate Matter Apportionment around a Steel Smelter Plant, 514

Arsenic
Assessing the Current and Future Impacts of the Disposal of Chromated Copper Arsenate-Treated Wood in Unlined Landfills, 332

Assessment
Global Climate Change and the Mitigation Challenge, 1194
The National Ambient Air Monitoring Strategy: Rethinking the Role of National Networks, 579

Atmospheric Optics
Introduction to a Special Issue of *JA&WMA* on Aerosol and Atmospheric Optics: Visual Air Quality and Radiation, 1025

Atmospheric Chemistry
The National Ambient Air Monitoring Strategy: Rethinking the Role of National Networks, 579
Ozone, Trace Gas, and Particulate Matter Measurements at a Rural Site in Southwestern New York State: 1995–2005, 293

Atmospheric Dispersion Modeling
Air Pollution and Survival within the Washington University–EPRI Veterans Cohort: Risks Based on Modeled Estimates of Ambient Levels of Hazardous and Criteria Air Pollutants, 473
Evaluation of Methodologies for Exposure Assessment to Atmospheric Pollutants from a Landfill Site, 490

Automotive
Accuracy of Exhaust Emission Factor Measurements on Chassis Dynamometer, 695
Current Understanding of Ultrafine Particulate Matter Emitted from Mobile Sources, 3
Effect of E85 on Tailpipe Emissions from Light-Duty Vehicles, 172
The In-Plume Emission Test Stand: An Instrument Platform for the Real-Time Characterization of Fuel-Based Combustion Emissions, 1437
Portable Emission Measurements of Yellowstone Park Snowcoaches and Snowmobiles, 936

Automotive Exhaust
Comparison of Flexible Fuel Vehicle and Life-Cycle Fuel Consumption and Emissions of Selected Pollutants and Greenhouse Gases for Ethanol 85 Versus Gasoline, 912
Effect of Open Channel Filter on Particle Emissions of Modern Diesel Engine, 1148

Bioaerosol
Evaluation of Bioaerosol Components, Generation Factors, and Airborne Transport Associated with Lime Treatment of Contaminated Sediment, 540
Reduction of Toxic Products and Bioaerosol Emission of a Combined Ultraviolet-Biofilter Process for Chlorobenzene Treatment, 405

Biodiesel
Carbonyl Compounds and Toxicity Assessments of Emissions from a Diesel Engine Running on Biodiesels, 163

Biofilm Layer
Analysis of Biofilters Using Synthetic Macroporous Foam Media, 834

Biofilter
Analysis of Biofilters Using Synthetic Macroporous Foam Media, 834
Evaluation of Wood Chip-Based Biofilters to Reduce Odor, Hydrogen Sulfide, and Ammonia from Swine Barn Ventilation Air, 520
Gaseous Oxygen Uptake in Porous Media at Different Moisture Contents and Airflow Velocities, 676
A Method for Estimating Mass-Transfer Coefficients in a Biofilter from Membrane Inlet Mass Spectrometer Data, 155
Reduction of Toxic Products and Bioaerosol Emission of a Combined Ultraviolet-Biofilter Process for Chlorobenzene Treatment, 405
Steady-State Performance of an Activated Carbon Biofilter Degrading Styrene: Effects of Residence Time and Inlet Concentration, 45

Biofiltration
Biofiltration of Air Contaminated by Styrene Vapors on Inorganic Filtering Media: An Experimental Study, 568

Biological Monitoring
Trace-Element Enrichment in Epiphytic Lichens and Tree Bark at Pico Island, Azores, Portugal, 411

Biological Treatment
Steady-State Performance of an Activated Carbon Biofilter Degrading Styrene: Effects of Residence Time and Inlet Concentration, 45
Treatment of Acetone Waste Gases Using Slurry-Phase Airlift Embedded with Polyacrylamide-Entrapped Cell Beads, 1230

Biotrickling Filter
Performance of a Pilot-Scale Biotrickling Filter in Controlling the Volatile Organic Compound Emissions in a Furniture Manufacturing Facility, 998

Boundary Layer
The Impact of Background Ozone on Compliance with Revised National Ambient Air Quality Standards, 52

Building Roof
Contamination of Fresh Air Intakes Due to Downwash from a Rooftop Structure, 343

Calcium Hydroxide
Chloride Behavior in Washing Experiments of Two Kinds of Municipal Solid Waste Incinerator Fly Ash with Different Alkaline Reagents, 139

Calculation Methods
Application of Optimally Scaled Target Factor Analysis for Assessing Source Contribution of Ambient PM_{10}, 1296

Carbon Capture
Potential Flue Gas Impurities in Carbon Dioxide Streams Separated from Coal-Fired Power Plants, 725

Carbon Dioxide (CO_2)
Global Climate Change and the Mitigation Challenge, 1194
Potential Flue Gas Impurities in Carbon Dioxide Streams Separated from Coal-Fired Power Plants, 725

Carbonaceous
Characterization of the Sunset Semi-Continuous Carbon Aerosol Analyzer, 826
Modifications to the Sunset Laboratory Carbon Aerosol Monitor for the Simultaneous Measurement of $PM_{2.5}$ Nonvolatile and Semi-Volatile Carbonaceous Material, 1007

Carbonyl Compounds
Carbonyl Compounds and Toxicity Assessments of Emissions from a Diesel Engine Running on Biodiesels, 163

Carbonyl Sulfide (COS)
Carbonyl Sulfide Removal with Compost and Wood Chip Biofilters, and in the Presence of Hydrogen Sulfide, 1458

Cation Exchange Capacity
Zeolite Formation from Coal Fly Ash and Its Adsorption Potential, 1140

Cement
Chloride Behavior in Washing Experiments of Two Kinds of Municipal Solid Waste Incinerator Fly Ash with Different Alkaline Reagents, 139
The Effects of Different Types of Nano-Silicon Dioxide Additives on the Properties of Sludge Ash Mortar, 440

Ceramic Industries
Application of Optimally Scaled Target Factor Analysis for Assessing Source Contribution of Ambient PM_{10}, 1296

Characterization
Characterization of the Sunset Semi-Continuous Carbon Aerosol Analyzer, 826
Development and Application of a Three-Dimensional Finite Element Vapor Intrusion Model, 447
Using a Direct Method to Characterize and Measure Flows of Municipal Solid Waste in the United States, 1386

Chassis Dynamometer
Comparison of Exhaust Emissions Resulting from Cold- and Hot-Start Motorcycle Driving Modes, 1339

Chat
Impact of Mine Waste on Airborne Respirable Particulates in Northeastern Oklahoma, United States, 1347

Chemical Mass Balance
Fine Particle Receptor Modeling in the Atmosphere of Mexico City, 1417
Using Mass Reconstruction along a Four-Site Transect as a Method to Interpret PM_{10} in West-Central Scotland, United Kingdom, 1429

Chloride
Chloride Behavior in Washing Experiments of Two Kinds of Municipal Solid Waste Incinerator Fly Ash with Different Alkaline Reagents, 139

Chlorobenzene
Effects of Operation Conditions on Removal Rate Constant and Quantum Yield of Gaseous Chlorobenzene Degradation in a Photochemical Reactor, 386
Reduction of Toxic Products and Bioaerosol Emission of a Combined Ultraviolet-Biofilter Process for Chlorobenzene Treatment, 405

Chromated Copper Arsenate (CCA)
Assessing the Current and Future Impacts of the Disposal of Chromated Copper Arsenate-Treated Wood in Unlined Landfills, 332

Clean Air Act (CAA)
The Impact of Background Ozone on Compliance with Revised National Ambient Air Quality Standards, 52

Climate Change
Potential Flue Gas Impurities in Carbon Dioxide Streams Separated from Coal-Fired Power Plants, 725

Coal-Burning Facilities
Energy Recycling by Co-Combustion of Coal and Recovered Paint Solids from Automobile Paint Operations, 560
Measurement and Capture of Fine and Ultrafine Particles from a Pilot-Scale Pulverized Coal Combustor with an Electrostatic Precipitator, 553

Coal Combustion
Energy Recycling by Co-Combustion of Coal and Recovered Paint Solids from Automobile Paint Operations, 560

Coal Fly Ash
Zeolite Formation from Coal Fly Ash and Its Adsorption Potential, 1140

Coal-Fired Power Plant
Cluster Analysis for Polychlorinated Dibenzo-*p*-Dioxins and Dibenzofurans Concentrations in Southern Taiwan, 1474

Coarse Particles
Intercomparison of Clean Air Status and Trends Network Nitrate and Nitric Acid Measurements with Data from Other Monitoring Programs, 214

Cohort Study
Air Pollution and Survival within the Washington University–EPRI Veterans Cohort: Risks Based on Modeled Estimates of Ambient Levels of Hazardous and Criteria Air Pollutants, 473

Community Multiscale Air Quality (CMAQ)
Modeling Regional/Urban Ozone and Particulate Matter in Beijing, China, 37

Composting Parameters
Evaluating Environmental Parameters for Minimum Ammonium Losses during Composting of Trimming Residues, 790

Conditional Probability Function
Source Apportionment of Airborne Particulate Matter for the Speciation Trends Network Site in Cleveland, OH, 321

Contaminated Sediment
Evaluation of Bioaerosol Components, Generation Factors, and Airborne Transport Associated with Lime Treatment of Contaminated Sediment, 540

Continuous Emission Monitoring
Cluster Analysis for Polychlorinated Dibenzo-*p*-Dioxins and Dibenzofurans Concentrations in Southern Taiwan, 1474
Seasonal Ammonia Emissions from a Free-Stall Dairy in Central Texas, 613

Control Technologies
Carbonyl Sulfide Removal with Compost and Wood Chip Biofilters, and in the Presence of Hydrogen Sulfide, 1458
Treatment of Acetone Waste Gases Using Slurry-Phase Airlift Embedded with Polyacrylamide-Entrapped Cell Beads, 1230

Controls
A New Technique for Characterizing the Efficacy of Fugitive Dust Suppressants, 603

Criteria Air Pollutants Emissions
Comparison of Exhaust Emissions Resulting from Cold- and Hot-Start Motorcycle Driving Modes, 1339

Critical Review
2009 Critical Review: Remote Sensing of Particulate Pollution from Space: Have We Reached the Promised Land?, 645
2009 Critical Review Discussion: Remote Sensing of Particulate Pollution from Space: Have We Reached the Promised Land?, 1130
Introduction to the 2009 Critical Review: Remote Sensing of Particulate Pollution from Space: Have We Reached the Promised Land?, 642

Crystalline Silica
PM_4 Crystalline Silica Emission Factors and Ambient Concentrations at Aggregate-Producing Sources in California, 1287

Crystallization
Zeolite Formation from Coal Fly Ash and Its Adsorption Potential, 1140

Data Collection
Portable Emission Measurements of Yellowstone Park Snowcoaches and Snowmobiles, 936
Real-World Energy Use and Emission Rates for Idling Long-Haul Trucks and Selected Idle Reduction Technologies, 857

Data Quality
Estimating Precision Using Duplicate Measurements, 1032
Using a Direct Method to Characterize and Measure Flows of Municipal Solid Waste in the United States, 1386

Databases
Applications of the Three-Dimensional Air Quality System to Western U.S. Air Quality: IDEA, Smog Blog, Smog Stories, AirQuest, and the Remote Sensing Information Gateway, 980

Decision-Making
Applications of the Three-Dimensional Air Quality System to Western U.S. Air Quality: IDEA, Smog Blog, Smog Stories, AirQuest, and the Remote Sensing Information Gateway, 980
An Interval Mixed-Integer Semi-Infinite Programming Method for Municipal Solid Waste Management, 236

Degradable Organic Carbon (DOCF)
Methane Emission Estimation from Landfills in Korea (1978–2004): Quantitative Assessment of a New Approach, 70

Desulfurization
Investigation of a Mercury Speciation Technique for Flue Gas Desulfurization Materials, 972

Detection Paper
Development of Colorimetric Ozone Detection Papers with High Ultraviolet Resistance Using Ultraviolet Absorbers, 801

Dibenzofurans (PCDD/Fs)
Cluster Analysis for Polychlorinated Dibenzo-*p*-Dioxins and Dibenzofurans Concentrations in Southern Taiwan, 1474

Diesel
Development of a Heavy Heavy-Duty Diesel Engine Schedule for Representative Measurement of Emissions, 950

Diesel Engine Emissions
Carbonyl Compounds and Toxicity Assessments of Emissions from a Diesel Engine Running on Biodiesels, 163
In-Plume Emission Test Stand 2: Emission Factors for 10- to 100-kW U.S. Military Generators, 1446

Diesel Particulate Filter
On-Road, In-Use Gaseous Emission Measurements by Remote Sensing of School Buses Equipped with Diesel Oxidation Catalysts and Diesel Particulate Filters, 1468

Diesel PM
In-Plume Emission Test Stand 2: Emission Factors for 10- to 100-kW U.S. Military Generators, 1446

Dilution
Contamination of Fresh Air Intakes Due to Downwash from a Rooftop Structure, 343
Dilution Rates for Tailpipe Emissions: Effects of Vehicle Shape, Tailpipe Position, and Exhaust Velocity, 715
Wind Tunnel Measurements of the Dilution of Tailpipe Emissions Downstream of a Car, a Light-Duty Truck, and a Heavy-Duty Truck Tractor Head, 704

Dispersion Models
Modeling of Personal Exposures to Ambient Air Toxics in Camden, New Jersey: An Evaluation Study, 733
A Robust Method for Estimating Landfill Methane Emissions, 925

Downwash
Contamination of Fresh Air Intakes Due to Downwash from a Rooftop Structure, 343

Dry Building Material
A New Method for Determining the Initial Mobile Formaldehyde Concentrations, Partition Coefficients, and Diffusion Coefficients of Dry Building Materials, 819

Duplicate Measurements
Estimating Precision Using Duplicate Measurements, 1032

Dust
Application of Optimally Scaled Target Factor Analysis for Assessing Source Contribution of Ambient PM_{10}, 1296
A Comparison of Lagrangian Model Estimates to Light Detection and Ranging (LIDAR) Measurements of Dust Plumes from Field Tilling, 1370

Dust Monitor
Aerosol Measurement: The Use of Optical Light Scattering for the Determination of Particulate Size Distribution, and Particulate Mass, Including the Semi-Volatile Fraction, 101

Dynamic Programming
Capacity Planning for Waste Management Systems: An Interval Fuzzy Robust Dynamic Programming Approach, 1317

Economic Commission for Europe (ECE) Drive Pattern
Comparison of Exhaust Emissions Resulting from Cold- and Hot-Start Motorcycle Driving Modes, 1339

Economics
Dynamic Analysis for Solid Waste Management Systems: An Inexact Multistage Integer Programming Approach, 279

ED-XRF
Coarse Particulate Matter Apportionment around a Steel Smelter Plant, 514

Effect of Water
Apportioning Visibility Degradation to Sources of $PM_{2.5}$ Using Positive Matrix Factorization, 1092

Electrostatic Precipitation
Measurement and Capture of Fine and Ultrafine Particles from a Pilot-Scale Pulverized Coal Combustor with an Electrostatic Precipitator, 553

Elemental Enrichment
Trace-Element Enrichment in Epiphytic Lichens and Tree Bark at Pico Island, Azores, Portugal, 411

Emission Controls
Could Ozonation Technology Really Work for Mitigating Air Emissions from Animal Feeding Operations?, 1239

Emission Factors
Cluster Analysis for Polychlorinated Dibenzo-*p*-Dioxins and Dibenzofurans Concentrations in Southern Taiwan, 1474
Development of Welding Emission Factors for Cr and Cr(VI) with a Confidence Level, 619
In-Plume Emission Test Stand 2: Emission Factors for 10- to 100-kW U.S. Military Generators, 1446
PM_4 Crystalline Silica Emission Factors and Ambient Concentrations at Aggregate-Producing Sources in California, 1287
Seasonal Ammonia Emissions from a Free-Stall Dairy in Central Texas, 613

Emission Index
Methodology to Estimate Particulate Matter Emissions from Certified Commercial Aircraft Engines, 91

Emission Inventories
A Compilation and Development of Spatial and Temporal Profiles of High-Resolution Emissions Inventory over Thailand, 845
Development of Welding Emission Factors for Cr and Cr(VI) with a Confidence Level, 619
The Importance of Policy in Emissions Inventory Accuracy—A Lesson from British Columbia, Canada, 430
The In-Plume Emission Test Stand: An Instrument Platform for the Real-Time Characterization of Fuel-Based Combustion Emissions, 1437
Seasonal Ammonia Emissions from a Free-Stall Dairy in Central Texas, 613

Emission Measurement Technologies
Research on Transportation-Related Emissions: Current Status and Future Directions, 183

Emission Modeling System
Research on Transportation-Related Emissions: Current Status and Future Directions, 183

Emission Models
Real-World Vehicle Emissions: A Summary of the 18th Coordinating Research Council On-Road Vehicle Emissions Workshop, 130

Emission Rates
Effect of E85 on Tailpipe Emissions from Light-Duty Vehicles, 172
Methodology to Estimate Particulate Matter Emissions from Certified Commercial Aircraft Engines, 91
Real-World Energy Use and Emission Rates for Idling Long-Haul Trucks and Selected Idle Reduction Technologies, 857

Emission Research Directions
Research on Transportation-Related Emissions: Current Status and Future Directions, 183

Emissions
Accuracy of Exhaust Emission Factor Measurements on Chassis Dynamometer, 695
Atmospheric Emissions from a Passenger Ferry with Selective Catalytic Reduction, 18
Comparison of Flexible Fuel Vehicle and Life-Cycle Fuel Consumption and Emissions of Selected Pollutants and Greenhouse Gases for Ethanol 85 Versus Gasoline, 912
Controls on Landfill Gas Collection Efficiency: Instantaneous and Lifetime Performance, 1399
Current Understanding of Ultrafine Particulate Matter Emitted from Mobile Sources, 3
Development of a Heavy Heavy-Duty Diesel Engine Schedule for Representative Measurement of Emissions, 950
Effect of E85 on Tailpipe Emissions from Light-Duty Vehicles, 172
The In-Plume Emission Test Stand: An Instrument Platform for the Real-Time Characterization of Fuel-Based Combustion Emissions, 1437
Methane Emission Estimation from Landfills in Korea (1978–2004): Quantitative Assessment of a New Approach, 70
A New Method for Determining the Initial Mobile Formaldehyde Concentrations, Partition Coefficients, and Diffusion Coefficients of Dry Building Materials, 819
A New Technique for Characterizing the Efficacy of Fugitive Dust Suppressants, 603
Portable Emission Measurements of Yellowstone Park Snowcoaches and Snowmobiles, 936
Real-Time Airflow Rate Measurements from Mechanically Ventilated Animal Buildings, 683
A Robust Method for Estimating Landfill Methane Emissions, 925
Source Contributions to Visibility Impairment in the Southeastern and Western United States, 1070
Testing of a Heavy Heavy-Duty Diesel Engine Schedule for Representative Measurement of Emissions, 960

Emissions Characterization
Coarse Particulate Matter Apportionment around a Steel Smelter Plant, 514
Extractive Sampling and Optical Remote Sensing of F100 Aircraft Engine Emissions, 531

Emissions Inventory
Real-World Vehicle Emissions: A Summary of the 18th Coordinating Research Council On-Road Vehicle Emissions Workshop, 130

Emissions Reduction
Evaluating Environmental Parameters for Minimum Ammonium Losses during Composting of Trimming Residues, 790
Particle Emissions from Ships: Dependence on Fuel Type, 1391

Energy Recovery
Energy Recycling by Co-Combustion of Coal and Recovered Paint Solids from Automobile Paint Operations, 560

Energy-Dispersive X-Ray Fluorescence (EDXRF)
Toward Establishing the Stability of Multi-Year Monitoring of Elements in Airborne Particles, 1040

Environmental Dust Monitor
Aerosol Measurement: The Use of Optical Light Scattering for the Determination of Particulate Size Distribution, and Particulate Mass, Including the Semi-Volatile Fraction, 101

Environmental Equity
The Social Distribution of Neighborhood-Scale Air Pollution and Monitoring Protection, 591

Environmental Management
Low-Energy and Chemical-Free Activation of Pyrolytic Tire Char and Its Adsorption Characteristics, 747

Environmental Protection
Dynamic Analysis for Solid Waste Management Systems: An Inexact Multistage Integer Programming Approach, 279
Portable Emission Measurements of Yellowstone Park Snowcoaches and Snowmobiles, 936

Environmental Public Health
Methods for Characterizing Fine Particulate Matter Using Ground Observations and Remotely Sensed Data: Potential Use for Environmental Public Health Surveillance, 865

EPA Ground Measurements
Methods for Characterizing Fine Particulate Matter Using Ground Observations and Remotely Sensed Data: Potential Use for Environmental Public Health Surveillance, 865

Epidemiology
Particulate Air Pollution and Health Effects for Cardiovascular and Respiratory Causes in Temuco, Chile: A Wood-Smoke-Polluted Urban Area, 1481

Epiphytic Lichens
Trace-Element Enrichment in Epiphytic Lichens and Tree Bark at Pico Island, Azores, Portugal, 411

Exhaust
Comparison of Exhaust Emissions Resulting from Cold- and Hot-Start Motorcycle Driving Modes, 1339
Dilution Rates for Tailpipe Emissions: Effects of Vehicle Shape, Tailpipe Position, and Exhaust Velocity, 715
Wind Tunnel Measurements of the Dilution of Tailpipe Emissions Downstream of a Car, a Light-Duty Truck, and a Heavy-Duty Truck Tractor Head, 704

Expanded Factor Analysis Model
Source Apportionment of Airborne Particulate Matter for the Speciation Trends Network Site in Cleveland, OH, 321

Exposure
A Comparative Analysis of Modeled and Monitored Ambient Hazardous Air Pollutants in Texas: A Novel Approach Using Concordance Correlation, 1278
Evaluation of Methodologies for Exposure Assessment to Atmospheric Pollutants from a Landfill Site, 490
Modeling of Personal Exposures to Ambient Air Toxics in Camden, New Jersey: An Evaluation Study, 733

Extinction Apportionment
Apportioning Visibility Degradation to Sources of $PM_{2.5}$ Using Positive Matrix Factorization, 1092

Failure Rate
Analysis of Motorcycle Exhaust Regular Testing Data—A Case Study of Taipei City, 757

Federal Test Procedure (FTP)
Development of a Heavy Heavy-Duty Diesel Engine Schedule for Representative Measurement of Emissions, 950
Testing of a Heavy Heavy-Duty Diesel Engine Schedule for Representative Measurement of Emissions, 960

Filter Pack
Intercomparison of Clean Air Status and Trends Network Nitrate and Nitric Acid Measurements with Data from Other Monitoring Programs, 214

Fine Particles
Surface-Level Fine Particle Mass Concentrations: From Hemispheric Distributions to Megacity Sources, 770
Using a Continuous Time Lag to Determine the Associations between Ambient $PM_{2.5}$ Hourly Levels and Daily Mortality, 1173

Flue Gases
Impact of Fly Ash Composition on Mercury Speciation in Simulated Flue Gas, 1331
Investigation of a Mercury Speciation Technique for Flue Gas Desulfurization Materials, 972

Fluorescent Lamps
Preventing Mercury Vapor Release from Broken Fluorescent Lamps during Shipping, 266

Flux Chamber
Seasonal Ammonia Emissions from a Free-Stall Dairy in Central Texas, 613

Fly Ash
Chloride Behavior in Washing Experiments of Two Kinds of Municipal Solid Waste Incinerator Fly Ash with Different Alkaline Reagents, 139
Impact of Fly Ash Composition on Mercury Speciation in Simulated Flue Gas, 1331

Formaldehyde
Deciphering the Role of Radical Precursors during the Second Texas Air Quality Study, 1258

Four-Stroke
Analysis of Motorcycle Exhaust Regular Testing Data—A Case Study of Taipei City, 757

Free-Stall Dairy
Seasonal Ammonia Emissions from a Free-Stall Dairy in Central Texas, 613

Fresno Studies
Apportioning Visibility Degradation to Sources of $PM_{2.5}$ Using Positive Matrix Factorization, 1092

Fuels
Comparison of Flexible Fuel Vehicle and Life-Cycle Fuel Consumption and Emissions of Selected Pollutants and Greenhouse Gases for Ethanol 85 Versus Gasoline, 912
Effect of E85 on Tailpipe Emissions from Light-Duty Vehicles, 172

Fugitive Dust
A New Technique for Characterizing the Efficacy of Fugitive Dust Suppressants, 603

Fugitive Emissions
Fugitive Dust Emissions from Paved Road Travel in the Lake Tahoe Basin, 1219

Fume Generation Rate
Development of Welding Emission Factors for Cr and Cr(VI) with a Confidence Level, 619

Functional Interval
An Interval Mixed-Integer Semi-Infinite Programming Method for Municipal Solid Waste Management, 236

Functional Linear Model
Using a Continuous Time Lag to Determine the Associations between Ambient $PM_{2.5}$ Hourly Levels and Daily Mortality, 1173

Fusion
Zeolite Formation from Coal Fly Ash and Its Adsorption Potential, 1140

Fuzzy Modeling
Evaluating Environmental Parameters for Minimum Ammonium Losses during Composting of Trimming Residues, 790

Fuzzy Robust Programming
Capacity Planning for Waste Management Systems: An Interval Fuzzy Robust Dynamic Programming Approach, 1317

Gas
Regional Impacts of Oil and Gas Development on Ozone Formation in the Western United States, 1111
The Importance of Policy in Emissions Inventory Accuracy—A Lesson from British Columbia, Canada, 430

Gas Flow Velocity
Gaseous Oxygen Uptake in Porous Media at Different Moisture Contents and Airflow Velocities, 676

Gas Sensor
Development of Colorimetric Ozone Detection Papers with High Ultraviolet Resistance Using Ultraviolet Absorbers, 801

Gaseous Particulate Matter (PM) Components
Associations between Personal, Indoor, and Residential Outdoor Pollutant Concentrations: Implications for Exposure Assessment to Size-Fractionated Particulate Matter, 392

Gasoline Trucks
Idle Emissions from Medium Heavy-Duty Diesel and Gasoline Trucks, 354

Geographical Information Systems
Evaluation of Methodologies for Exposure Assessment to Atmospheric Pollutants from a Landfill Site, 490
Road-Network-Based Spatial Allocation of On-Road Mobile Source Emissions in the Pearl River Delta Region, China, and Comparisons with Population-Based Approach, 1405

Geostationary Operational Environmental Satellite (GOES)
Comparison of GOES and MODIS Aerosol Optical Depth (AOD) to Aerosol Robotic Network (AERONET) AOD and IMPROVE $PM_{2.5}$ Mass at Bondville, Illinois, 1082

Global Particle Distributions
Surface-Level Fine Particle Mass Concentrations: From Hemispheric Distributions to Megacity Sources, 770

Global Pollution
Surface-Level Fine Particle Mass Concentrations: From Hemispheric Distributions to Megacity Sources, 770

Global Warming/Greenhouse Effect
Global Climate Change and the Mitigation Challenge, 1194
Potential Flue Gas Impurities in Carbon Dioxide Streams Separated from Coal-Fired Power Plants, 725

Greenhouse Gas (GHG)
Comparison of Flexible Fuel Vehicle and Life-Cycle Fuel Consumption and Emissions of Selected Pollutants and Greenhouse Gases for Ethanol 85 Versus Gasoline, 912
Controls on Landfill Gas Collection Efficiency: Instantaneous and Lifetime Performance, 1399
Greenhouse Gas and Air Pollutant Emission Reduction Potentials of Renewable Energy—Case Studies on Photovoltaic and Wind Power Introduction Considering Interactions among Technologies in Taiwan, 360

Ground-Level Ozone
Quantifying the Spatial and Temporal Variation of Ground-Level Ozone in the Rural Annapolis Valley, Nova Scotia, Canada Using Nitrite-Impregnated Passive Samplers, 310

Groundwater
Assessing the Current and Future Impacts of the Disposal of Chromated Copper Arsenate-Treated Wood in Unlined Landfills, 332

Hazardous Air Pollutants
Air Pollution and Survival within the Washington University–EPRI Veterans Cohort: Risks Based on Modeled Estimates of Ambient Levels of Hazardous and Criteria Air Pollutants, 473
A Comparative Analysis of Modeled and Monitored Ambient Hazardous Air Pollutants in Texas: A Novel Approach Using Concordance Correlation, 1278
Carbonyl Sulfide Removal with Compost and Wood Chip Biofilters, and in the Presence of Hydrogen Sulfide, 1458

Hazardous Waste Management
Preventing Mercury Vapor Release from Broken Fluorescent Lamps during Shipping, 266

Hazardous Waste Sites
Development and Application of a Three-Dimensional Finite Element Vapor Intrusion Model, 447

Haze
Particulate Matter Sample Deposit Geometry and Effective Filter Face Velocities, 1045

Health Effects/Risks
Combining Regional- and Local-Scale Air Quality Models with Exposure Models for Use in Environmental Health Studies, 461
Estimating Mortality Effects of Fine Particulate Matter in Japan: A Comparison of Time-Series and Case-Crossover Analyses, 1212
Multipathway Screening Factors for Assessing Risks from Ingestion Exposures to Air Pollutants, 419
Testing of a Heavy Heavy-Duty Diesel Engine Schedule for Representative Measurement of Emissions, 960

Heavy-Duty Engine
Development of a Heavy Heavy-Duty Diesel Engine Schedule for Representative Measurement of Emissions, 950

Hot Spot
Modeling of Personal Exposures to Ambient Air Toxics in Camden, New Jersey: An Evaluation Study, 733

Human Exposure
Combining Regional- and Local-Scale Air Quality Models with Exposure Models for Use in Environmental Health Studies, 461
An Optimal Spatial Configuration of Sample Sites for Air Pollution Monitoring, 1308
The Social Distribution of Neighborhood-Scale Air Pollution and Monitoring Protection, 591

Hydrodynamics
Analysis of Biofilters Using Synthetic Macroporous Foam Media, 834

Hydrogen Sulfide (H_2S)
Carbonyl Sulfide Removal with Compost and Wood Chip Biofilters, and in the Presence of Hydrogen Sulfide, 1458
Replacement of Hazardous Chromium Impregnating Agent from Silver/Copper/Chromium-Impregnated Active Carbon Using Triethylenediamine to Remove Hydrogen Sulfide, Trichloromethane, Ammonia, and Sulfur Dioxide, 258

Idle Emissions
Idle Emissions from Medium Heavy-Duty Diesel and Gasoline Trucks, 354

Idle Fuel Consumption
Idle Emissions from Medium Heavy-Duty Diesel and Gasoline Trucks, 354

Immobilization
Treatment of Acetone Waste Gases Using Slurry-Phase Airlift Embedded with Polyacrylamide-Entrapped Cell Beads, 1230

Impinger
Evaluation of Bioaerosol Components, Generation Factors, and Airborne Transport Associated with Lime Treatment of Contaminated Sediment, 540

Inactive Volume
Gaseous Oxygen Uptake in Porous Media at Different Moisture Contents and Airflow Velocities, 676

Indoor
Associations between Personal, Indoor, and Residential Outdoor Pollutant Concentrations: Implications for Exposure Assessment to Size-Fractionated Particulate Matter, 392

Indoor Air Pollution
Adsorption and Regeneration on Activated Carbon Fiber Cloth for Volatile Organic Compounds at Indoor Concentration Levels, 31
Titanium Dioxide/Zeolite Catalytic Adsorbent for the Removal of NO and Acetone Vapors, 1186

Indoor Air Quality
A New Method for Determining the Initial Mobile Formaldehyde Concentrations, Partition Coefficients, and Diffusion Coefficients of Dry Building Materials, 819

Industrial Pollution
Coarse Particulate Matter Apportionment around a Steel Smelter Plant, 514

Ingestion
Multipathway Screening Factors for Assessing Risks from Ingestion Exposures to Air Pollutants, 419

Inhalation Epidemiology Study (ARIES)
Analytical Determination of the Aerosol Organic Mass-to-Organic Carbon Ratio, 58

Innovative Technologies
Global Climate Change and the Mitigation Challenge, 1194

Interagency Monitoring of Protected Visual Environments (IMPROVE)
Methods to Assess Carbonaceous Aerosol Sampling Artifacts for IMPROVE and Other Long-Term Networks, 898

Interval
Capacity Planning for Waste Management Systems: An Interval Fuzzy Robust Dynamic Programming Approach, 1317

Intraurban Air Pollution
An Optimal Spatial Configuration of Sample Sites for Air Pollution Monitoring, 1308

Isopropyl Alcohol (IPA)
Adsorption Kinetic, Thermodynamic, and Desorption Studies of Isopropyl Alcohol Vapor by Oxidized Single-Walled Carbon Nanotubes, 990

Japan
Estimating Mortality Effects of Fine Particulate Matter in Japan: A Comparison of Time-Series and Case-Crossover Analyses, 1212

K_La
A Method for Estimating Mass-Transfer Coefficients in a Biofilter from Membrane Inlet Mass Spectrometer Data, 155

Kinetic Modeling
Kinetic Modeling on the Adsorption of Vapor-Phase Mercury Chloride on Activated Carbon by Thermogravimetric Analysis, 227

Kinetics
Adsorption Kinetic, Thermodynamic, and Desorption Studies of Isopropyl Alcohol Vapor by Oxidized Single-Walled Carbon Nanotubes, 990
The Effect of Oxygen on the Kinetics of the Thermal Degradation for Rice Straw, 148

Lagrangian Model
A Comparison of Lagrangian Model Estimates to Light Detection and Ranging (LIDAR) Measurements of Dust Plumes from Field Tilling, 1370

Landfill Gas
Controls on Landfill Gas Collection Efficiency: Instantaneous and Lifetime Performance, 1399
A Robust Method for Estimating Landfill Methane Emissions, 925

Landfills
Assessing the Current and Future Impacts of the Disposal of Chromated Copper Arsenate-Treated Wood in Unlined Landfills, 332
Controls on Landfill Gas Collection Efficiency: Instantaneous and Lifetime Performance, 1399
Evaluation of Methodologies for Exposure Assessment to Atmospheric Pollutants from a Landfill Site, 490
Methane Emission Estimation from Landfills in Korea (1978–2004): Quantitative Assessment of a New Approach, 70
A Robust Method for Estimating Landfill Methane Emissions, 925

Legislation
Effect of Air Pollution Controls on Black Smoke and Sulfur Dioxide Concentrations across Ireland, 207

Light Detection
A Comparison of Lagrangian Model Estimates to Light Detection and Ranging (LIDAR) Measurements of Dust Plumes from Field Tilling, 1370

Light Extinction
Using High Time Resolution Aerosol and Number Size Distribution Measurements to Estimate Atmospheric Extinction, 1049

Linear Programming
Greenhouse Gas and Air Pollutant Emission Reduction Potentials of Renewable Energy—Case Studies on Photovoltaic and Wind Power Introduction Considering Interactions among Technologies in Taiwan, 360

Marine
Atmospheric Emissions from a Passenger Ferry with Selective Catalytic Reduction, 18

Marine Fuels
Particle Emissions from Ships: Dependence on Fuel Type, 1391

Mass Balance
Analytical Determination of the Aerosol Organic Mass-to-Organic Carbon Ratio, 58

Mass Transfer
A New Method for Determining the Initial Mobile Formaldehyde Concentrations, Partition Coefficients, and Diffusion Coefficients of Dry Building Materials, 819

***k*-Means Cluster Analysis**
Cluster Analysis for Polychlorinated Dibenzo-*p*-Dioxins and Dibenzofurans Concentrations in Southern Taiwan, 1474

Measurement Techniques
Accuracy of Exhaust Emission Factor Measurements on Chassis Dynamometer, 695
Characterization of the Sunset Semi-Continuous Carbon Aerosol Analyzer, 826
Ozone, Trace Gas, and Particulate Matter Measurements at a Rural Site in Southwestern New York State: 1995–2005, 293

Medium-Duty Diesel
Idle Emissions from Medium Heavy-Duty Diesel and Gasoline Trucks, 354

Megacities
Surface-Level Fine Particle Mass Concentrations: From Hemispheric Distributions to Megacity Sources, 770

MENTOR
Modeling of Personal Exposures to Ambient Air Toxics in Camden, New Jersey: An Evaluation Study, 733

Mercury
Impact of Fly Ash Composition on Mercury Speciation in Simulated Flue Gas, 1331
Investigation of a Mercury Speciation Technique for Flue Gas Desulfurization Materials, 972
Preventing Mercury Vapor Release from Broken Fluorescent Lamps during Shipping, 266

Meteorological Conditions
Analysis of Traffic and Meteorology on Airborne Particulate Matter in Münster, Northwest Germany, 809

Methane (CH_4) Emission
Methane Emission Estimation from Landfills in Korea (1978–2004): Quantitative Assessment of a New Approach, 70

Methane Correction Factor (MCF)
Methane Emission Estimation from Landfills in Korea (1978–2004): Quantitative Assessment of a New Approach, 70

Mexico City
Assessment of the Ozone-Nitrogen Oxide-Volatile Organic Compound Sensitivity of Mexico City through an Indicator-Based Approach: Measurements and Numerical Simulations Comparison, 1155

Microtox Test
Carbonyl Compounds and Toxicity Assessments of Emissions from a Diesel Engine Running on Biodiesels, 163

Mining
Impact of Mine Waste on Airborne Respirable Particulates in Northeastern Oklahoma, United States, 1347

Mitigation
Could Ozonation Technology Really Work for Mitigating Air Emissions from Animal Feeding Operations?, 1239
Global Climate Change and the Mitigation Challenge, 1194
Particulate Matter Emission Factors for Almond Harvest as a Function of Harvester Speed, 943

Mobile Source Emissions
Road-Network-Based Spatial Allocation of On-Road Mobile Source Emissions in the Pearl River Delta Region, China, and Comparisons with Population-Based Approach, 1405

Mobile Sources
Accuracy of Exhaust Emission Factor Measurements on Chassis Dynamometer, 695
Current Understanding of Ultrafine Particulate Matter Emitted from Mobile Sources, 3
Effect of E85 on Tailpipe Emissions from Light-Duty Vehicles, 172
Methodology to Estimate Particulate Matter Emissions from Certified Commercial Aircraft Engines, 91
Real-World Energy Use and Emission Rates for Idling Long-Haul Trucks and Selected Idle Reduction Technologies, 857

Modeling
Analysis of Biofilters Using Synthetic Macroporous Foam Media, 834
Accuracy of Exhaust Emission Factor Measurements on Chassis Dynamometer, 695
A Comparative Analysis of Modeled and Monitored Ambient Hazardous Air Pollutants in Texas: A Novel Approach Using Concordance Correlation, 1278
Controls on Landfill Gas Collection Efficiency: Instantaneous and Lifetime Performance, 1399
Current Understanding of Ultrafine Particulate Matter Emitted from Mobile Sources, 3
Dynamic Analysis for Solid Waste Management Systems: An Inexact Multistage Integer Programming Approach, 279
A Method for Estimating Mass-Transfer Coefficients in a Biofilter from Membrane Inlet Mass Spectrometer Data, 155
Methodology to Estimate Particulate Matter Emissions from Certified Commercial Aircraft Engines, 91

Moderate Resolution Imaging Spectroradiometer (MODIS)
Comparison of GOES and MODIS Aerosol Optical Depth (AOD) to Aerosol Robotic Network (AERONET) AOD and IMPROVE $PM_{2.5}$ Mass at Bondville, Illinois, 1082
The Relation between Moderate Resolution Imaging Spectroradiometer (MODIS) Aerosol Optical Depth and $PM_{2.5}$ over the United States: A Geographical Comparison by U.S. Environmental Protection Agency Regions, 1358

Monitoring
A Comparative Analysis of Modeled and Monitored Ambient Hazardous Air Pollutants in Texas: A Novel Approach Using Concordance Correlation, 1278
The National Ambient Air Monitoring Strategy: Rethinking the Role of National Networks, 579
The Social Distribution of Neighborhood-Scale Air Pollution and Monitoring Protection, 591

Mortality
Air Pollution and Survival within the Washington University–EPRI Veterans Cohort: Risks Based on Modeled Estimates of Ambient Levels of Hazardous and Criteria Air Pollutants, 473

Motor Vehicles
Comparison of Flexible Fuel Vehicle and Life-Cycle Fuel Consumption and Emissions of Selected Pollutants and Greenhouse Gases for Ethanol 85 Versus Gasoline, 912
Real-World Energy Use and Emission Rates for Idling Long-Haul Trucks and Selected Idle Reduction Technologies, 857

Multipathway
Multipathway Screening Factors for Assessing Risks from Ingestion Exposures to Air Pollutants, 419

Multilinear Engine
Application of Optimally Scaled Target Factor Analysis for Assessing Source Contribution of Ambient PM_{10}, 1296

Municipal Solid Waste (MSW)
An Interval Mixed-Integer Semi-Infinite Programming Method for Municipal Solid Waste Management, 236
A Robust Method for Estimating Landfill Methane Emissions, 925

Nanomaterial
The Effects of Different Types of Nano-Silicon Dioxide Additives on the Properties of Sludge Ash Mortar, 440

Nanoparticles
Current Understanding of Ultrafine Particulate Matter Emitted from Mobile Sources, 3
Using a Continuous Time Lag to Determine the Associations between Ambient $PM_{2.5}$ Hourly Levels and Daily Mortality, 1173

Nanosized Particles
Effect of Open Channel Filter on Particle Emissions of Modern Diesel Engine, 1148

National Parks
Regional Impacts of Oil and Gas Development on Ozone Formation in the Western United States, 1111

Neural Network
Analysis of Traffic and Meteorology on Airborne Particulate Matter in Münster, Northwest Germany, 809

Nitrates
Characterization of the Winter Midwestern Particulate Nitrate Bulge, 1061
Using High Time Resolution Aerosol and Number Size Distribution Measurements to Estimate Atmospheric Extinction, 1049

Nitric Acid
Intercomparison of Clean Air Status and Trends Network Nitrate and Nitric Acid Measurements with Data from Other Monitoring Programs, 214

Nitrogen
Using High Time Resolution Aerosol and Number Size Distribution Measurements to Estimate Atmospheric Extinction, 1049

Nitrogen Concentration
Biofiltration of Air Contaminated by Styrene Vapors on Inorganic Filtering Media: An Experimental Study, 568

Nitrogen Oxides (NO_x)
The Importance of Policy in Emissions Inventory Accuracy—A Lesson from British Columbia, Canada, 430
On-Road, In-Use Gaseous Emission Measurements by Remote Sensing of School Buses Equipped with Diesel Oxidation Catalysts and Diesel Particulate Filters, 1468
Titanium Dioxide/Zeolite Catalytic Adsorbent for the Removal of NO and Acetone Vapors, 1186

Nitrous Acid
Deciphering the Role of Radical Precursors during the Second Texas Air Quality Study, 1258

Non-Road Engine
In-Plume Emission Test Stand 2: Emission Factors for 10- to 100-kW U.S. Military Generators, 1446

Non-Road Mobile Sources
Real-World Vehicle Emissions: A Summary of the 18th Coordinating Research Council On-Road Vehicle Emissions Workshop, 130

Odor
Carbonyl Sulfide Removal with Compost and Wood Chip Biofilters, and in the Presence of Hydrogen Sulfide, 1458
Evaluation of Wood Chip-Based Biofilters to Reduce Odor, Hydrogen Sulfide, and Ammonia from Swine Barn Ventilation Air, 520

Oil
Regional Impacts of Oil and Gas Development on Ozone Formation in the Western United States, 1111

On-Road Mobile Sources
Real-World Vehicle Emissions: A Summary of the 18th Coordinating Research Council On-Road Vehicle Emissions Workshop, 130

Open Street Canopy
Transport Mechanisms of Coarse, Fine, and Very Fine Particulate Matter in Urban Street Canopies with Different Building Layouts, 196

Optical Properties
Particle Optics in the Rayleigh Regime, 1028

Optical Remote Sensing
Particle Optics in the Rayleigh Regime, 1028

Optimal Spatial Sampling
An Optimal Spatial Configuration of Sample Sites for Air Pollution Monitoring, 1308

Organic Carbon (OC)
Methods to Assess Carbonaceous Aerosol Sampling Artifacts for IMPROVE and Other Long-Term Networks, 898

Organic Matter (OM)/Organic Carbon (OC) Ratio
Analytical Determination of the Aerosol Organic Mass-to-Organic Carbon Ratio, 58

Outdoor Air Pollution
Associations between Personal, Indoor, and Residential Outdoor Pollutant Concentrations: Implications for Exposure Assessment to Size-Fractionated Particulate Matter, 392

Oxidation
Impact of Fly Ash Composition on Mercury Speciation in Simulated Flue Gas, 1331

Oxides of Nitrogen (NO_x)
Atmospheric Emissions from a Passenger Ferry with Selective Catalytic Reduction, 18

Oxygen Consumption
Gaseous Oxygen Uptake in Porous Media at Different Moisture Contents and Airflow Velocities, 676

Ozonation
Could Ozonation Technology Really Work for Mitigating Air Emissions from Animal Feeding Operations?, 1239

Ozone (O_3)
Assessment of the Ozone-Nitrogen Oxide-Volatile Organic Compound Sensitivity of Mexico City through an Indicator-Based Approach: Measurements and Numerical Simulations Comparison, 1155
Development of Colorimetric Ozone Detection Papers with High Ultraviolet Resistance Using Ultraviolet Absorbers, 801
The Impact of Background Ozone on Compliance with Revised National Ambient Air Quality Standards, 52
Modeling Regional/Urban Ozone and Particulate Matter in Beijing, China, 37
Ozone, Trace Gas, and Particulate Matter Measurements at a Rural Site in Southwestern New York State: 1995–2005, 293
Regional Impacts of Oil and Gas Development on Ozone Formation in the Western United States, 1111

Particle
Associations between Personal, Indoor, and Residential Outdoor Pollutant Concentrations: Implications for Exposure Assessment to Size-Fractionated Particulate Matter, 392

Particle Chemical Composition
Surface-Level Fine Particle Mass Concentrations: From Hemispheric Distributions to Megacity Sources, 770

Particle Nitrates
Intercomparison of Clean Air Status and Trends Network Nitrate and Nitric Acid Measurements with Data from Other Monitoring Programs, 214

Particle Oxidation Catalyst
Effect of Open Channel Filter on Particle Emissions of Modern Diesel Engine, 1148

Particulate Matter (PM)
Aerosol Measurement: The Use of Optical Light Scattering for the Determination of Particulate Size Distribution, and Particulate Mass, Including the Semi-Volatile Fraction, 101
Characterization of the Winter Midwestern Particulate Nitrate Bulge, 1061
Combining Regional- and Local-Scale Air Quality Models with Exposure Models for Use in Environmental Health Studies, 461
A Comparison of Lagrangian Model Estimates to Light Detection and Ranging (LIDAR) Measurements of Dust Plumes from Field Tilling, 1370
Current Understanding of Ultrafine Particulate Matter Emitted from Mobile Sources, 3
Effect of Air Pollution Controls on Black Smoke and Sulfur Dioxide Concentrations across Ireland, 207
Fine Particle Receptor Modeling in the Atmosphere of Mexico City, 1417
Measurement and Capture of Fine and Ultrafine Particles from a Pilot-Scale Pulverized Coal Combustor with an Electrostatic Precipitator, 553
Measurements of OC and EC in Coarse Particulate Matter in the Southeastern United States, 78
Methodology to Estimate Particulate Matter Emissions from Certified Commercial Aircraft Engines, 91
Methods for Characterizing Fine Particulate Matter Using Ground Observations and Remotely Sensed Data: Potential Use for Environmental Public Health Surveillance, 865
An Optimal Spatial Configuration of Sample Sites for Air Pollution Monitoring, 1308
Ozone, Trace Gas, and Particulate Matter Measurements at a Rural Site in Southwestern New York State: 1995–2005, 293
Particle Emissions from Ships: Dependence on Fuel Type, 1391
Particulate Matter Sample Deposit Geometry and Effective Filter Face Velocities, 1045
Source Apportionment of Airborne Particulate Matter for the Speciation Trends Network Site in Cleveland, OH, 321
Using High Time Resolution Aerosol and Number Size Distribution Measurements to Estimate Atmospheric Extinction, 1049

Particulate Pollution
2009 Critical Review Discussion: Remote Sensing of Particulate Pollution from Space: Have We Reached the Promised Land?, 1130

Passive Samplers
Quantifying the Spatial and Temporal Variation of Ground-Level Ozone in the Rural Annapolis Valley, Nova Scotia, Canada Using Nitrite-Impregnated Passive Samplers, 310

Personal Exposure
Associations between Personal, Indoor, and Residential Outdoor Pollutant Concentrations: Implications for Exposure Assessment to Size-Fractionated Particulate Matter, 392

pH
A Method for Estimating Mass-Transfer Coefficients in a Biofilter from Membrane Inlet Mass Spectrometer Data, 155

Photochemical Indicators
Assessment of the Ozone-Nitrogen Oxide-Volatile Organic Compound Sensitivity of Mexico City through an Indicator-Based Approach: Measurements and Numerical Simulations Comparison, 1155

Photochemical Reactor
Effects of Operation Conditions on Removal Rate Constant and Quantum Yield of Gaseous Chlorobenzene Degradation in a Photochemical Reactor, 386

Pilot Unit
Performance of a Pilot-Scale Biotrickling Filter in Controlling the Volatile Organic Compound Emissions in a Furniture Manufacturing Facility, 998

Plume
A Comparison of Lagrangian Model Estimates to Light Detection and Ranging (LIDAR) Measurements of Dust Plumes from Field Tilling, 1370
Contamination of Fresh Air Intakes Due to Downwash from a Rooftop Structure, 343

PM_{10}
Analysis of Traffic and Meteorology on Airborne Particulate Matter in Münster, Northwest Germany, 809
Coarse Particulate Matter Apportionment around a Steel Smelter Plant, 514
Fugitive Dust Emissions from Paved Road Travel in the Lake Tahoe Basin, 1219
A New Technique for Characterizing the Efficacy of Fugitive Dust Suppressants, 603
Particulate Matter Emission Factors for Almond Harvest as a Function of Harvester Speed, 943
Using Mass Reconstruction along a Four-Site Transect as a Method to Interpret PM_{10} in West-Central Scotland, United Kingdom, 1429

$PM_{10-2.5}$
Measurements of OC and EC in Coarse Particulate Matter in the Southeastern United States, 78

$PM_{2.5}$
Apportioning Visibility Degradation to Sources of $PM_{2.5}$ Using Positive Matrix Factorization, 1092

Characterization of the Sunset Semi-Continuous Carbon Aerosol Analyzer, 826
Comparison of GOES and MODIS Aerosol Optical Depth (AOD) to Aerosol Robotic Network (AERONET) AOD and IMPROVE $PM_{2.5}$ Mass at Bondville, Illinois, 1082
2009 Critical Review: Remote Sensing of Particulate Pollution from Space: Have We Reached the Promised Land?, 645
Estimating Mortality Effects of Fine Particulate Matter in Japan: A Comparison of Time-Series and Case-Crossover Analyses, 1212
Modeling Regional/Urban Ozone and Particulate Matter in Beijing, China, 37
Particulate Air Pollution and Health Effects for Cardiovascular and Respiratory Causes in Temuco, Chile: A Wood-Smoke-Polluted Urban Area, 1481
Particulate Matter Emission Factors for Almond Harvest as a Function of Harvester Speed, 943
Particulate Matter Sample Deposit Geometry and Effective Filter Face Velocities, 1045
The Relation between Moderate Resolution Imaging Spectroradiometer (MODIS) Aerosol Optical Depth and $PM_{2.5}$ over the United States: A Geographical Comparison by U.S. Environmental Protection Agency Regions, 1358
Toward Establishing the Stability of Multi-Year Monitoring of Elements in Airborne Particles, 1040

PM_4
PM_4 Crystalline Silica Emission Factors and Ambient Concentrations at Aggregate-Producing Sources in California, 1287

$PM_{2.5}$ Monitor
Aerosol Measurement: The Use of Optical Light Scattering for the Determination of Particulate Size Distribution, and Particulate Mass, Including the Semi-Volatile Fraction, 101

$PM_{10}/PM_{2.5}/PM_1$
Transport Mechanisms of Coarse, Fine, and Very Fine Particulate Matter in Urban Street Canopies with Different Building Layouts, 196

Polar Organic Compounds
Analytical Determination of the Aerosol Organic Mass-to-Organic Carbon Ratio, 58

Policy Decision-Making
Dynamic Analysis for Solid Waste Management Systems: An Inexact Multistage Integer Programming Approach, 279

Pollutant Dispersion
Contamination of Fresh Air Intakes Due to Downwash from a Rooftop Structure, 343

Pollution Control Equipment
On-Road, In-Use Gaseous Emission Measurements by Remote Sensing of School Buses Equipped with Diesel Oxidation Catalysts and Diesel Particulate Filters, 1468

Pollution Prevention
Real-World Energy Use and Emission Rates for Idling Long-Haul Trucks and Selected Idle Reduction Technologies, 857

Polychlorinated Dibenzo-*p*-Dioxins
Cluster Analysis for Polychlorinated Dibenzo-*p*-Dioxins and Dibenzofurans Concentrations in Southern Taiwan, 1474

Polyurethane Foam
Analysis of Biofilters Using Synthetic Macroporous Foam Media, 834

Population-Based Approach
Road-Network-Based Spatial Allocation of On-Road Mobile Source Emissions in the Pearl River Delta Region, China, and Comparisons with Population-Based Approach, 1405

Positive Matrix Factorization
Application of Optimally Scaled Target Factor Analysis for Assessing Source Contribution of Ambient PM_{10}, 1296

Potential Source Contribution Function
Source Apportionment of Airborne Particulate Matter for the Speciation Trends Network Site in Cleveland, OH, 321

Precision
Estimating Precision Using Duplicate Measurements, 1032

Pyrolysis
The Effect of Oxygen on the Kinetics of the Thermal Degradation for Rice Straw, 148

Quality Assurance
Toward Establishing the Stability of Multi-Year Monitoring of Elements in Airborne Particles, 1040

Quantum Yield
Effects of Operation Conditions on Removal Rate Constant and Quantum Yield of Gaseous Chlorobenzene Degradation in a Photochemical Reactor, 386

Radiative Transfer
Particle Optics in the Rayleigh Regime, 1028

Radicals
Deciphering the Role of Radical Precursors during the Second Texas Air Quality Study, 1258

Ranging (LIDAR)
A Comparison of Lagrangian Model Estimates to Light Detection and Ranging (LIDAR) Measurements of Dust Plumes from Field Tilling, 1370

Real-World Emissions
In-Plume Emission Test Stand 2: Emission Factors for 10- to 100-kW U.S. Military Generators, 1446

Receptor Modeling
Application of Optimally Scaled Target Factor Analysis for Assessing Source Contribution of Ambient PM_{10}, 1296
Fine Particle Receptor Modeling in the Atmosphere of Mexico City, 1417
Using Mass Reconstruction along a Four-Site Transect as a Method to Interpret PM_{10} in West-Central Scotland, United Kingdom, 1429

Recycling
Compositions of Volatile Organic Compounds Emitted from Melted Virgin and Waste Plastic Pellets, 273
Low-Energy and Chemical-Free Activation of Pyrolytic Tire Char and Its Adsorption Characteristics, 747
Preventing Mercury Vapor Release from Broken Fluorescent Lamps during Shipping, 266

Regional Haze
Source Contributions to Visibility Impairment in the Southeastern and Western United States, 1070
Using High Time Resolution Aerosol and Number Size Distribution Measurements to Estimate Atmospheric Extinction, 1049

Regional Modeling
Regional Impacts of Oil and Gas Development on Ozone Formation in the Western United States, 1111

Regulations
The Social Distribution of Neighborhood-Scale Air Pollution and Monitoring Protection, 591

Remote Sensing
Applications of the Three-Dimensional Air Quality System to Western U.S. Air Quality: IDEA, Smog Blog, Smog Stories, AirQuest, and the Remote Sensing Information Gateway, 980
2009 Critical Review: Remote Sensing of Particulate Pollution from Space: Have We Reached the Promised Land?, 645
2009 Critical Review Discussion: Remote Sensing of Particulate Pollution from Space: Have We Reached the Promised Land?, 1130
Extractive Sampling and Optical Remote Sensing of F100 Aircraft Engine Emissions, 531
On-Road, In-Use Gaseous Emission Measurements by Remote Sensing of School Buses Equipped with Diesel Oxidation Catalysts and Diesel Particulate Filters, 1468

Removal Rate Constant
Effects of Operation Conditions on Removal Rate Constant and Quantum Yield of Gaseous Chlorobenzene Degradation in a Photochemical Reactor, 386

Renewable Energy
Greenhouse Gas and Air Pollutant Emission Reduction Potentials of Renewable Energy—Case Studies on Photovoltaic and Wind Power Introduction Considering Interactions among Technologies in Taiwan, 360

Reproducibility
Toward Establishing the Stability of Multi-Year Monitoring of Elements in Airborne Particles, 1040

Respiratory Health
Particulate Air Pollution and Health Effects for Cardiovascular and Respiratory Causes in Temuco, Chile: A Wood-Smoke-Polluted Urban Area, 1481

Rice Straw
The Effect of Oxygen on the Kinetics of the Thermal Degradation for Rice Straw, 148

Risk Assessment
Multipathway Screening Factors for Assessing Risks from Ingestion Exposures to Air Pollutants, 419

Riverside
Apportioning Visibility Degradation to Sources of $PM_{2.5}$ Using Positive Matrix Factorization, 1092

Road Dust
Fugitive Dust Emissions from Paved Road Travel in the Lake Tahoe Basin, 1219

Road-Network-Based Approach
Road-Network-Based Spatial Allocation of On-Road Mobile Source Emissions in the Pearl River Delta Region, China, and Comparisons with Population-Based Approach, 1405

Rural Environments
Quantifying the Spatial and Temporal Variation of Ground-Level Ozone in the Rural Annapolis Valley, Nova Scotia, Canada Using Nitrite-Impregnated Passive Samplers, 310

Sampling
The In-Plume Emission Test Stand: An Instrument Platform for the Real-Time Characterization of Fuel-Based Combustion Emissions, 1437
Particulate Matter Sample Deposit Geometry and Effective Filter Face Velocities, 1045

Sampling Artifact
Methods to Assess Carbonaceous Aerosol Sampling Artifacts for IMPROVE and Other Long-Term Networks, 898

Satellite Observations
2009 Critical Review: Remote Sensing of Particulate Pollution from Space: Have We Reached the Promised Land?, 645

Satellite Remote Sensing
Methods for Characterizing Fine Particulate Matter Using Ground Observations and Remotely Sensed Data: Potential Use for Environmental Public Health Surveillance, 865

Scenarios
Methane Emission Estimation from Landfills in Korea (1978–2004): Quantitative Assessment of a New Approach, 70

School Bus
On-Road, In-Use Gaseous Emission Measurements by Remote Sensing of School Buses Equipped with Diesel Oxidation Catalysts and Diesel Particulate Filters, 1468

Seasonal Effects
Effect of Air Pollution Controls on Black Smoke and Sulfur Dioxide Concentrations across Ireland, 207

Selective Catalytic Reduction (SCR)
Atmospheric Emissions from a Passenger Ferry with Selective Catalytic Reduction, 18

Semi-Infinite
An Interval Mixed-Integer Semi-Infinite Programming Method for Municipal Solid Waste Management, 236

Semi-Volatile Aerosol Monitor
Aerosol Measurement: The Use of Optical Light Scattering for the Determination of Particulate Size Distribution, and Particulate Mass, Including the Semi-Volatile Fraction, 101

Semi-Volatile Organic Carbonaceous Material (SVOM)
Modifications to the Sunset Laboratory Carbon Aerosol Monitor for the Simultaneous Measurement of $PM_{2.5}$ Nonvolatile and Semi-Volatile Carbonaceous Material, 1007

Semi-Volatile $PM_{2.5}$
Modifications to the Sunset Laboratory Carbon Aerosol Monitor for the Simultaneous Measurement of $PM_{2.5}$ Nonvolatile and Semi-Volatile Carbonaceous Material, 1007

Sequestration
Potential Flue Gas Impurities in Carbon Dioxide Streams Separated from Coal-Fired Power Plants, 725

Sewage Sludge
The Effects of Different Types of Nano-Silicon Dioxide Additives on the Properties of Sludge Ash Mortar, 440

Ship Emissions
Particle Emissions from Ships: Dependence on Fuel Type, 1391

Shipping
Preventing Mercury Vapor Release from Broken Fluorescent Lamps during Shipping, 266

Single-Walled Carbon Nanotubes (SWCNTs)
Adsorption Kinetic, Thermodynamic, and Desorption Studies of Isopropyl Alcohol Vapor by Oxidized Single-Walled Carbon Nanotubes, 990

Size Distribution
Measurement and Capture of Fine and Ultrafine Particles from a Pilot-Scale Pulverized Coal Combustor with an Electrostatic Precipitator, 553

Size-Fractionated Particulate Matter (PM)
Associations between Personal, Indoor, and Residential Outdoor Pollutant Concentrations: Implications for Exposure Assessment to Size-Fractionated Particulate Matter, 392

Smoke Abatement
Effect of Air Pollution Controls on Black Smoke and Sulfur Dioxide Concentrations across Ireland, 207

Smooth Distributed Lag Model
Using a Continuous Time Lag to Determine the Associations between Ambient $PM_{2.5}$ Hourly Levels and Daily Mortality, 1173

Snowcoaches
Portable Emission Measurements of Yellowstone Park Snowcoaches and Snowmobiles, 936

Snowmobiles
Portable Emission Measurements of Yellowstone Park Snowcoaches and Snowmobiles, 936

Sodium Bicarbonate
Chloride Behavior in Washing Experiments of Two Kinds of Municipal Solid Waste Incinerator Fly Ash with Different Alkaline Reagents, 139

Soft X-Ray
Measurement and Capture of Fine and Ultrafine Particles from a Pilot-Scale Pulverized Coal Combustor with an Electrostatic Precipitator, 553

Soot
Effect of Open Channel Filter on Particle Emissions of Modern Diesel Engine, 1148

Source Apportionment
Impact of Mine Waste on Airborne Respirable Particulates in Northeastern Oklahoma, United States, 1347
Source Apportionment of Airborne Particulate Matter for the Speciation Trends Network Site in Cleveland, OH, 321
Source Contributions to Visibility Impairment in the Southeastern and Western United States, 1070
Using Mass Reconstruction along a Four-Site Transect as a Method to Interpret PM_{10} in West-Central Scotland, United Kingdom, 1429

Source Contribution
Fine Particle Receptor Modeling in the Atmosphere of Mexico City, 1417

Source Profiles
Application of Optimally Scaled Target Factor Analysis for Assessing Source Contribution of Ambient PM_{10}, 1296
Coarse Particulate Matter Apportionment around a Steel Smelter Plant, 514
Fine Particle Receptor Modeling in the Atmosphere of Mexico City, 1417
Methodology to Estimate Particulate Matter Emissions from Certified Commercial Aircraft Engines, 91
Source Apportionment of Airborne Particulate Matter for the Speciation Trends Network Site in Cleveland, OH, 321

Spatial Allocation
A Compilation and Development of Spatial and Temporal Profiles of High-Resolution Emissions Inventory over Thailand, 845
Road-Network-Based Spatial Allocation of On-Road Mobile Source Emissions in the Pearl River Delta Region, China, and Comparisons with Population-Based Approach, 1405

Spatial Autocorrelation
An Optimal Spatial Configuration of Sample Sites for Air Pollution Monitoring, 1308

Spatial Surfaces
Methods for Characterizing Fine Particulate Matter Using Ground Observations and Remotely Sensed Data: Potential Use for Environmental Public Health Surveillance, 865

Spatiotemporal Variability
Quantifying the Spatial and Temporal Variation of Ground-Level Ozone in the Rural Annapolis Valley, Nova Scotia, Canada Using Nitrite-Impregnated Passive Samplers, 310

Speciation Trends Network
Source Apportionment of Airborne Particulate Matter for the Speciation Trends Network Site in Cleveland, OH, 321

Spherical Activated Carbon
Kinetic Modeling on the Adsorption of Vapor-Phase Mercury Chloride on Activated Carbon by Thermogravimetric Analysis, 227

Spray Paint Booth
Performance of a Pilot-Scale Biotrickling Filter in Controlling the Volatile Organic Compound Emissions in a Furniture Manufacturing Facility, 998

Staggered Street Canopy
Transport Mechanisms of Coarse, Fine, and Very Fine Particulate Matter in Urban Street Canopies with Different Building Layouts, 196

State Implementation Plans (SIPs)
Deciphering the Role of Radical Precursors during the Second Texas Air Quality Study, 1258

Stationary Sources
Greenhouse Gas and Air Pollutant Emission Reduction Potentials of Renewable Energy—Case Studies on Photovoltaic and Wind Power Introduction Considering Interactions among Technologies in Taiwan, 360

Steel Production
Coarse Particulate Matter Apportionment around a Steel Smelter Plant, 514

Styrene
Biofiltration of Air Contaminated by Styrene Vapors on Inorganic Filtering Media: An Experimental Study, 568
Steady-State Performance of an Activated Carbon Biofilter Degrading Styrene: Effects of Residence Time and Inlet Concentration, 45

Sulfur Dioxide (SO_2)
Replacement of Hazardous Chromium Impregnating Agent from Silver/Copper/Chromium-Impregnated Active Carbon Using Triethylenediamine to Remove Hydrogen Sulfide, Trichloromethane, Ammonia, and Sulfur Dioxide, 258

Sulfur Gases
A Method for Estimating Mass-Transfer Coefficients in a Biofilter from Membrane Inlet Mass Spectrometer Data, 155

Sulfur Oxides (SO_x)
The Importance of Policy in Emissions Inventory Accuracy—A Lesson from British Columbia, Canada, 430

Sunset Dual-Oven Monitor
Modifications to the Sunset Laboratory Carbon Aerosol Monitor for the Simultaneous Measurement of $PM_{2.5}$ Nonvolatile and Semi-Volatile Carbonaceous Material, 1007

Sunset Organic Carbon/Elemental Carbon (OCEC)
Characterization of the Sunset Semi-Continuous Carbon Aerosol Analyzer, 826

Tar Creek Superfund Site
Impact of Mine Waste on Airborne Respirable Particulates in Northeastern Oklahoma, United States, 1347

Target Factor Analysis
Application of Optimally Scaled Target Factor Analysis for Assessing Source Contribution of Ambient PM_{10}, 1296

Temporal Allocation Profile
A Compilation and Development of Spatial and Temporal Profiles of High-Resolution Emissions Inventory over Thailand, 845

Test Cycle
Development of a Heavy Heavy-Duty Diesel Engine Schedule for Representative Measurement of Emissions, 950

Testing
PM_4 Crystalline Silica Emission Factors and Ambient Concentrations at Aggregate-Producing Sources in California, 1287

Thailand
A Compilation and Development of Spatial and Temporal Profiles of High-Resolution Emissions Inventory over Thailand, 845

Thermal Degradation
The Effect of Oxygen on the Kinetics of the Thermal Degradation for Rice Straw, 148

Thermal Gravimetric Analysis
The Effect of Oxygen on the Kinetics of the Thermal Degradation for Rice Straw, 148

Thermodynamics
Adsorption Kinetic, Thermodynamic, and Desorption Studies of Isopropyl Alcohol Vapor by Oxidized Single-Walled Carbon Nanotubes, 990

Thermogravimetric Analysis
Kinetic Modeling on the Adsorption of Vapor-Phase Mercury Chloride on Activated Carbon by Thermogravimetric Analysis, 227

Thiosphaera pantotropha
Treatment of Acetone Waste Gases Using Slurry-Phase Airlift Embedded with Polyacrylamide-Entrapped Cell Beads, 1230

Total Suspended Particulate (TSP)
Particulate Matter Emission Factors for Almond Harvest as a Function of Harvester Speed, 943

Toxicity
Reduction of Toxic Products and Bioaerosol Emission of a Combined Ultraviolet-Biofilter Process for Chlorobenzene Treatment, 405

Toxics
Combining Regional- and Local-Scale Air Quality Models with Exposure Models for Use in Environmental Health Studies, 461

Trace Elements
Energy Recycling by Co-Combustion of Coal and Recovered Paint Solids from Automobile Paint Operations, 560

TRACE-P
Modeling Regional/Urban Ozone and Particulate Matter in Beijing, China, 37

Traction Control
Fugitive Dust Emissions from Paved Road Travel in the Lake Tahoe Basin, 1219

Traffic
Air Pollution and Survival within the Washington University–EPRI Veterans Cohort: Risks Based on Modeled Estimates of Ambient Levels of Hazardous and Criteria Air Pollutants, 473
Analysis of Traffic and Meteorology on Airborne Particulate Matter in Münster, Northwest Germany, 809

TRAKER
Fugitive Dust Emissions from Paved Road Travel in the Lake Tahoe Basin, 1219

Transport Mechanism
Transport Mechanisms of Coarse, Fine, and Very Fine Particulate Matter in Urban Street Canopies with Different Building Layouts, 196

Transportation-Related Emissions
Research on Transportation-Related Emissions: Current Status and Future Directions, 183

Treatment Technologies
Treatment of Acetone Waste Gases Using Slurry-Phase Airlift Embedded with Polyacrylamide-Entrapped Cell Beads, 1230

Tree Bark
Trace-Element Enrichment in Epiphytic Lichens and Tree Bark at Pico Island, Azores, Portugal, 411

Triethylenediamine
Replacement of Hazardous Chromium Impregnating Agent from Silver/Copper/Chromium-Impregnated Active Carbon Using Triethylenediamine to Remove Hydrogen Sulfide, Trichloromethane, Ammonia, and Sulfur Dioxide, 258

Trimming Residues
Evaluating Environmental Parameters for Minimum Ammonium Losses during Composting of Trimming Residues, 790

Tropospheric
Assessment of the Ozone-Nitrogen Oxide-Volatile Organic Compound Sensitivity of Mexico City through an Indicator-Based Approach: Measurements and Numerical Simulations Comparison, 1155
The Impact of Background Ozone on Compliance with Revised National Ambient Air Quality Standards, 52
Ozone, Trace Gas, and Particulate Matter Measurements at a Rural Site in Southwestern New York State: 1995–2005, 293

Turbine Engine
Extractive Sampling and Optical Remote Sensing of F100 Aircraft Engine Emissions, 531

Two-Stroke
Analysis of Motorcycle Exhaust Regular Testing Data—A Case Study of Taipei City, 757

Ultraviolet (UV) Absorber
Development of Colorimetric Ozone Detection Papers with High Ultraviolet Resistance Using Ultraviolet Absorbers, 801

Ultraviolet Photodegradation
Reduction of Toxic Products and Bioaerosol Emission of a Combined Ultraviolet-Biofilter Process for Chlorobenzene Treatment, 405

Upper Confidence Level of the Mean
Development of Welding Emission Factors for Cr and Cr(VI) with a Confidence Level, 619

Upstream Oil
The Importance of Policy in Emissions Inventory Accuracy—A Lesson from British Columbia, Canada, 430

Urban Areas
Analysis of Traffic and Meteorology on Airborne Particulate Matter in Münster, Northwest Germany, 809

An Optimal Spatial Configuration of Sample Sites for Air Pollution Monitoring, 1308

Urban Ozone
Assessment of the Ozone-Nitrogen Oxide-Volatile Organic Compound Sensitivity of Mexico City through an Indicator-Based Approach: Measurements and Numerical Simulations Comparison, 1155

Vapors
Development and Application of a Three-Dimensional Finite Element Vapor Intrusion Model, 447

Variance Maximization
An Optimal Spatial Configuration of Sample Sites for Air Pollution Monitoring, 1308

Vehicle
Dilution Rates for Tailpipe Emissions: Effects of Vehicle Shape, Tailpipe Position, and Exhaust Velocity, 715
Wind Tunnel Measurements of the Dilution of Tailpipe Emissions Downstream of a Car, a Light-Duty Truck, and a Heavy-Duty Truck Tractor Head, 704

Visibility
Particle Optics in the Rayleigh Regime, 1028
Source Contributions to Visibility Impairment in the Southeastern and Western United States, 1070

Volatile Organic Compounds (VOCs)
Adsorption and Regeneration on Activated Carbon Fiber Cloth for Volatile Organic Compounds at Indoor Concentration Levels, 31
Biofiltration of Air Contaminated by Styrene Vapors on Inorganic Filtering Media: An Experimental Study, 568
Compositions of Volatile Organic Compounds Emitted from Melted Virgin and Waste Plastic Pellets, 273
Effects of Operation Conditions on Removal Rate Constant and Quantum Yield of Gaseous Chlorobenzene Degradation in a Photochemical Reactor, 386
The Importance of Policy in Emissions Inventory Accuracy—A Lesson from British Columbia, Canada, 430
Investigation of the Treatability of the Primary Indoor Volatile Organic Compounds on Activated Carbon Fiber Cloths at Typical Indoor Concentrations, 882
A New Method for Determining the Initial Mobile Formaldehyde Concentrations, Partition Coefficients, and Diffusion Coefficients of Dry Building Materials, 819
Performance of a Pilot-Scale Biotrickling Filter in Controlling the Volatile Organic Compound Emissions in a Furniture Manufacturing Facility, 998
Steady-State Performance of an Activated Carbon Biofilter Degrading Styrene: Effects of Residence Time and Inlet Concentration, 45
Titanium Dioxide/Zeolite Catalytic Adsorbent for the Removal of NO and Acetone Vapors, 1186
Treatment of Acetone Waste Gases Using Slurry-Phase Airlift Embedded with Polyacrylamide-Entrapped Cell Beads, 1230

Waste Disposal
Assessing the Current and Future Impacts of the Disposal of Chromated Copper Arsenate-Treated Wood in Unlined Landfills, 332
Controls on Landfill Gas Collection Efficiency: Instantaneous and Lifetime Performance, 1399

Waste Management
Capacity Planning for Waste Management Systems: An Interval Fuzzy Robust Dynamic Programming Approach, 1317
Dynamic Analysis for Solid Waste Management Systems: An Inexact Multistage Integer Programming Approach, 279
Evaluating Environmental Parameters for Minimum Ammonium Losses during Composting of Trimming Residues, 790
Low-Energy and Chemical-Free Activation of Pyrolytic Tire Char and Its Adsorption Characteristics, 747
Using a Direct Method to Characterize and Measure Flows of Municipal Solid Waste in the United States, 1386

Waste Plastics
Compositions of Volatile Organic Compounds Emitted from Melted Virgin and Waste Plastic Pellets, 273

Waste Reduction
Low-Energy and Chemical-Free Activation of Pyrolytic Tire Char and Its Adsorption Characteristics, 747
Using a Direct Method to Characterize and Measure Flows of Municipal Solid Waste in the United States, 1386

Waste Stream
Using a Direct Method to Characterize and Measure Flows of Municipal Solid Waste in the United States, 1386

Waste Treatment
Compositions of Volatile Organic Compounds Emitted from Melted Virgin and Waste Plastic Pellets, 273

Water Content
Gaseous Oxygen Uptake in Porous Media at Different Moisture Contents and Airflow Velocities, 676

Welding Processes
Development of Welding Emission Factors for Cr and Cr(VI) with a Confidence Level, 619

Wind Tunnel
Dilution Rates for Tailpipe Emissions: Effects of Vehicle Shape, Tailpipe Position, and Exhaust Velocity, 715
Evaluation of Bioaerosol Components, Generation Factors, and Airborne Transport Associated with Lime Treatment of Contaminated Sediment, 540
Wind Tunnel Measurements of the Dilution of Tailpipe Emissions Downstream of a Car, a Light-Duty Truck, and a Heavy-Duty Truck Tractor Head, 704

Wood Burning
Particulate Air Pollution and Health Effects for Cardiovascular and Respiratory Causes in Temuco, Chile: A Wood-Smoke-Polluted Urban Area, 1481

Wood Smoke
Particulate Air Pollution and Health Effects for Cardiovascular and Respiratory Causes in Temuco, Chile: A Wood-Smoke-Polluted Urban Area, 1481

Wood Treating
Assessing the Current and Future Impacts of the Disposal of Chromated Copper Arsenate-Treated Wood in Unlined Landfills, 332

Zeolite X
Zeolite Formation from Coal Fly Ash and Its Adsorption Potential, 1140

Author Index
